What is a content management system?

Most successful website have in common that their content is always up-to-date. A content management system helps you to achieve this. All you need to update the content of your website is a web browser (e.g. Internet Explorer or Firefox), your account details, and an Internet connection. There is no need to as your web master or web designer to make common updates on your website. You can easily keep your website up-to-date from all over the world.

In addition, most content management systems provide you with helpful tools and features like a search form for your website content, the arrangement of your content in different categories, contact forms, tools for building web communities, web shops, newsletters and much more.
